7. CULTURAL SAFETY STATEMENT

At Elizabeth Grace Psychology, I honour the uniqueness, humanity, and lived journey of every individual I work with — regardless of background, culture, or history. My commitment is to walk beside each client with respect, care, and a genuine desire to support their healing and transformation.

I acknowledge the enduring strength, wisdom, and cultural richness of Australia's First Peoples, and I pay my respects to Elders past and present. I honour their resilience and ongoing connection to Country.

I also extend respect to all culturally and linguistically diverse individuals and communities across Australia.

I recognise that colonisation, systemic inequity, and cultural trauma continue to impact Aboriginal and Torres Strait Islander peoples and other marginalised communities.

I commit to offering a practice that respects, protects, and upholds the dignity and uniqueness of every client — inclusive of their culture, language, spirituality, ancestry, gender, neurodiversity, ability, and worldview.

I understand that cultural safety is not a fixed standard defined by me — it is an evolving, lived experience defined by each client. Therefore, cultural safety in my practice is an ongoing, relational, and reflective process grounded in cultural humility and accountability.

My commitments to cultural safety include:

- Listening deeply and non-defensively to every person's lived experience
- Creating a safe, inclusive, and responsive therapeutic space where all aspects of identity, belief, and background are respected
- Working respectfully across differences in ethnicity, gender, sexuality, faith, ability, age, and socio-economic status
- Seeking cultural supervision or consultation where appropriate to support culturally responsive care
- Remaining open to feedback that strengthens safety, trust, and healing in the therapeutic relationship
- Actively reflecting on my own cultural positioning, biases, and assumptions to ensure they do not impede care

If at any time you feel that I have not upheld these values or that the therapeutic space has felt unsafe or invalidating, I wholeheartedly invite you to raise this with me. Your experience matters. Together, we will work to review and repair the relationship, with care and respect.

Cultural safety is not a destination — it is a commitment I renew each day, in service of your healing, growth, and sovereignty.

Elizabeth Oliver, Psychologist PSY0001622084
