

CAPABILITY STATEMENT

Technical Training • Workforce Upskilling • Institutional Delivery

WCC Assessments is the trading name of Tarsicode CC, a Pretoria-based private skills development provider founded in 2011. WCC delivers accredited, practical and progression-focused training across electrical engineering, ETD, ICT and renewable energy pathways for individual learners, employers and public-sector institutions.

Who We Serve

- Individual learners seeking technical progression and recognised pathways
- Employers requiring workforce upskilling and structured group training
- Municipalities, public entities and funded programme buyers
- Institutions requiring practical delivery, learner support and reporting discipline

Delivery Formats

- Full-time and part-time face-to-face delivery on campus
- Practical workshop-based training and assessment support
- Off-site and employer-based delivery where required
- Structured learner support, onboarding and digital coordination

Core Capability Areas

Electrical & Artisan Progression

N4–N6 engineering studies, electrical compliance and progression pathways, practical technical training and artisan-focused capability development.

ETD: Facilitator, Assessor & Moderator

Recognised ETD-aligned programmes for trainers, assessors and moderators, suited to individual professionals and institutional capacity building.

ICT & Digital Skills

QCTO-accredited occupational programmes in AI software development, software development, software engineering, cybersecurity analysis and software testing.

Solar & Renewable Energy

Solar and renewable-energy aligned pathways supported by sector membership positioning and energy-transition relevance for public and private buyers.

Accreditation, Membership & Compliance Profile

- EWSETA-accredited skills development provider (Accreditation No. WIL101) valid to 30 June 2027.
- QCTO accreditation at Shop 13, Hatfield Corner for National Certificate N4, N5 and N6 Engineering Studies (Electrical Engineering), valid to 30 June 2027.
- QCTO accreditation at Shop 26–27, Hatfield Corner for occupational ICT programmes including AI Software Developer, Software Developer, Software Engineer, Cybersecurity Analyst and Software Tester, valid to 30 June 2030.
- CompTIA Partner status valid to 28 February 2027 and SAPVIA membership valid to 31 March 2027.
- COIDA Letter of Good Standing valid to 30 April 2027, fire compliance certificate valid to 11 March 2027, and commercial insurance cover in place for business all risks, electronic equipment, public liability and business interruption.

Institutional fit

Structured support

Reporting-ready

Facilities, Delivery Footprint & Learner Environment

WCC operates from Hatfield Corner in Pretoria, with facilities spanning Shop 13 and Shop 26–27. The centre includes lecture rooms, an electrical practical room, a solar PV practical room, a full computer lab, administration offices, learner support areas, resource materials and accessible transport-linked location advantages. Delivery can take place on campus, off-site, or through employer-based arrangements depending on programme design and buyer requirements.

Why Institutions Work With WCC

Practical Delivery Training is positioned around workplace relevance, practical competence and learner progression rather than catalogue-only delivery.	Flexible Implementation WCC can support on-campus, off-site and blended implementation formats, including “we come to you” delivery for employer or institutional cohorts.
Learner Support & Reporting Structured learner administration, onboarding, support and progress-tracking can be strengthened through SecretScoop-powered admissions, membership and assessment workflows.	Mandate Fit WCC’s offer aligns with direct learner recruitment, employer upskilling and municipal / public-sector capability development across technical and digital pathways.
