FLEET
VISIBILITY

THE CHALLENGE

How a national surveillance provider scaled mobile deployments without adding operational complexity. Growing a mobile surveillance fleet meant connectivity had to move with every trailer, **anywhere in the U.S.**

The company needed:

- ✓ Reliable connectivity at every jobsite
- ✓ Visibility across trailers and employee devices
- ✓ Predictable costs and centralized control
- ✓ Less time managing carriers and support
- ✓ Without adding headcount or operational overhead.

Before MHD

- ✗ Multiple carrier relationships
- ✗ No centralized visibility
- ✗ Unpredictable usage and overages
- ✗ Operations managing carrier portals
- ✗ Fragmented accountability

THE RESULT

More administration. Less focus on growth.

THE SOLUTION

One Connected Environment. MHD unified mobile surveillance connectivity and corporate mobility into one managed ecosystem.

Mobile Trailer Connectivity
Cellular managed for every moving deployment.

Corporate Device Management
Employee devices consolidated under one plan.

Usage Visibility & Monitoring
Proactive monitoring and simplified control.

Single Point of Accountability
One team. One relationship. One support experience.

"They just handle it. I don't have to chase anyone down. When something needs to change, onecall takes care of it."

WHAT THE CUSTOMER GETS

Faster onboarding. New trailers activated without slowing operations.
Connectivity everywhere. Urban jobsites and remote locations covered.
Complete visibility. Devices and fleet managed in one environment.
One call support. No carrier coordination.
Scalable growth. Add more units without increasing complexity.

THE IMPACT

Operations stopped managing carriers and returned to managing the business.
One connected environment. Built to move at the speed of growth.
