

GCSE Science Tutor

Let's Pass — small-group GCSE tuition

We're looking for a GCSE Science tutor to join a small, high-calibre teaching team, for parents who want steady, expert support for their child, not last-minute panic.

About Let's Pass

I'm Lorraine, a teacher turned founder of Let's Pass. We run small-group GCSE tuition in Maths, English and Science, built on the idea that consistent, expert teaching beats last-minute cramming every time. Groups are small, 4 to 8 students, grouped by ability, and led by tutors who know their subject inside out. Many of our team are examiners or senior leaders in schools. A lot of our parents take more than one subject with us, which tells you what they think of the teaching. We're careful about who joins the team, because the standard of tuition is the whole business.

The role

- Self-employed contractor role, invoiced half-termly
- Weekly GCSE Science group of 4 to 8 students, following Havering term dates (no sessions in school holidays, unless you choose to run Year 11 holiday revision)
- Delivered online via Zoom
- £12.50 per student per group session, or £35 per hour for 1:1 where that's needed
- Sessions run after school and at weekends in term time, so you'll need to be free at those times each week
- We're looking for tutors who can commit for the full academic year, so students get consistency rather than a revolving door of teachers

What you'll be doing

- Teaching GCSE Science (combined or separate Biology, Chemistry and Physics) to a mixed-ability group, covering both the theory and the practical skills that come up in exams
- Planning your own lessons and using your own resources, tailored to where your group actually is, not a generic scheme of work
- Setting homework that actually informs what you teach next, not homework for its own sake
- Keeping useful records of progress and flagging anything a parent needs to know, early

- Managing day-to-day questions from parents and students via WhatsApp
- Staying current with GCSE Science specification changes

What we're looking for

- QTS, and real classroom experience you can point to
- Examiner or senior leadership experience is a strong plus
- Comfortable running a group, not a series of 1:1s side by side. Managing different personalities and ability levels in one session is part of the job, and it's part of what makes Let's Pass work
- Able to work independently and get things done without being chased
- Direct, honest communication, including with parents when the conversation isn't easy
- On the DBS update service
- Confident with Zoom, Gmail and Google Drive; TutorBird experience is a bonus

Non-negotiables

- QTS
- On the DBS update service
- Full fluency in English, spoken and written
- Reliable wifi and your own computer, because our teaching depends on it working properly

Before you apply

If you've read this properly, include the word “noted” somewhere in your application. It tells me who reads instructions and who doesn't, and that matters here.

How to apply

Send Lorraine a voice note on 07538957492, telling her about your experience and why small-group teaching appeals to you. If it looks like a fit, I'll be in touch to arrange a conversation. If you don't hear back, thank you for applying. I keep strong applications on file and come back to them when a group opens up.
