# ABOUT ISAAC

---

Isaac Wambua is the founder and CEO of [Dynamo Methods](#), a leadership and business systems firm based in Kansas City. His frameworks have been used by executives, C-suites, and organizations to build self-managing teams and develop leaders who multiply impact within and outside their organizations.

An industrial engineer by training, Isaac is a five-time bestselling author with more than two decades of experience in leadership, growth, and development. As the creator of the Dynamo Business Operating System (DBOS) and the Dynamo Leadership Operating System (DLOS), he equips leaders to build companies that run without them and helps leaders evolve from doing the work to multiplying the people who do.

His latest book, [The Multiplier Leader](#), was released in May 2026 and anchors his signature keynote of the same name. Born in a small Kenyan village and raised by a single mother, Isaac brings a rare combination of engineering rigor, lived experience, and the conviction that the most enduring leaders are the ones who quietly develop the next generation behind them.
