AV Rider · Event Technical Requirements

Founder & CEO, Dynamo Methods · Leadership Systems Architect · 5X Bestselling Author

AV REQUIREMENTS

To ensure a smooth and high-quality presentation experience, please provide the following:

AUDIO

- Wireless lavalier / clip-on microphone for Isaac.
- Backup handheld wireless microphone.
- Room audio capable of playing embedded video and music from the presentation.

DISPLAY & CONNECTIVITY

- Ability to connect Isaac's laptop to the room sound system.
- HDMI connection for presentation display, with an HDMI adapter backup available on-site.
- Large screen or LED display suitable for visual presentations.
- Bright projector or high-resolution screen display.
- Confidence monitor preferred, if available.
- Presentation clicker / slide advancer.

STAGE, LIGHTING & ACCESS

- Table or podium near the stage for laptop placement, if needed.
- Adequate stage room for movement during the keynote or workshop.
- Strong front lighting so the speaker is clearly visible.
- Access to the room at least 45–60 minutes before start time for sound check and slide testing.

PRESENTATION NOTES

Isaac's presentations are visual, practical, and may include embedded video, audience interaction, and live teaching moments. Please confirm that **both the presentation visuals and audio are tested before attendees enter the room.**

Preferred setup: Isaac presents using his own laptop unless otherwise arranged in advance.

ROOM SETUP PREFERENCES

- Clear stage or presentation area with space to move.
- Audience seating arranged to maximize visibility and engagement.
- For workshops, round tables or classroom-style seating are preferred.
- For keynotes, theater-style seating is acceptable.
- Water available on stage or near the speaking area.
