

Clinical Experience & Qualifications

Seventeen years of critical care nursing have provided a broad foundation in the care of high-acuity patients, advanced monitoring, complex pharmacologic management, and interdisciplinary teamwork.

Core Critical Care Competencies

- **Advanced Life Support:** CRRT, Impella, IABP, EVD monitoring, and RotoProne/Roto bed therapy
- **Invasive Monitoring:** Swan-Ganz (pulmonary artery) catheters, arterial lines, central venous pressure monitoring, and ICP monitoring
- **Ventilator Support:** Advanced mechanical ventilation modes, ARDS protocols, and oscillatory ventilation

Advanced Pharmacologic Titrations

- **Vasoactive / Inotropic:** Norepinephrine, epinephrine, phenylephrine, vasopressin, milrinone, and dobutamine
- **Sedation / Analgesia:** Propofol, dexmedetomidine, midazolam, fentanyl, and ketamine infusions
- **Antiarrhythmics:** Amiodarone, diltiazem, esmolol, and lidocaine titrations

Leadership & Professional Contributions

- **Leadership Roles:** Charge Nurse and preceptor for new nurses and staff
- **Unit Contribution:** Unit Practice Council member
- **Professional Focus:** Ongoing development in advanced critical care practice and preparation for nurse anesthesia education

Certifications

Current: CCRN • TNCC • ENCP • ACLS • PALS

In Progress: CMC / CSC
