Course Information

Two days inside the building where OsseoPure implants are designed, restored and placed.

This is not a lecture hall course. You spend two days at OsseoPure headquarters in Lancaster, New York, moving from the system fundamentals to a hands-on workshop on day one, then into the surgical suite for live surgery and case review on day two. The lab that produces your restorations is down the hall, and the people who built the system are in the room.

WHAT YOU'LL LEARN

- Place OsseoPure implants with a repeatable surgical and restorative workflow
- Select cases and plan treatment around implant design, surface and indications
- Handle healing caps, scan bodies, multi-unit abutments and bridge seating hands-on
- Watch real-time surgical decision-making in a live case, then review complications and troubleshooting
- Work through real attendee cases in an extended case review session
- Plan cases the way the lab needs them and choose the right components
- Build the patient journey, financing and treatment coordinator role that drive case acceptance

WHO SHOULD ATTEND

General dentists adding or expanding implant placement, restorative dentists who want to understand the surgical side, and teams who want a system they can run together. Bring your treatment coordinator for the Friday afternoon business and marketing sessions.

WHY THIS COURSE IS DIFFERENT

Everything happens at OsseoPure headquarters. Lecture in the morning, instruments in your hands by one o'clock, and live surgery the next day. Groups stay small so every attendee gets reps, questions get answered, and you leave with a workflow you can run Monday morning.

FACULTY

Dr. Matt LaSorsa, DMD

LANCASTER, NY · NOVEMBER 13–14

Beyond the Classroom

Two days of CE at the home of OsseoPure, a night with the faculty, and a city worth arriving early for.

THE VENUE

OsseoPure Headquarters

4401 Walden Avenue, Lancaster, NY 14086

Every session happens under one roof: the lecture room, the hands-on lab and the surgical suite where the live case is performed, with the lab that designs and mills OsseoPure restorations down the hall. Nothing is simulated and nothing is off site.

SURGICAL SUITE	Live surgery observed in person, in small groups
ON-SITE LAB	Watch how your cases are planned, designed and finished
HANDS-ON LAB	One station per attendee for the workshop sessions
GETTING THERE	10 minutes from Buffalo Niagara International Airport (BUF)
PARKING	Free on-site parking

DAY 1 · FRIDAY, NOV 13 · 5:30 PM

INCLUDED FOR ALL ATTENDEES

Cocktails & Networking at OsseoPure HQ

When the first day wraps, the lab turns into a lounge. Drinks and small plates with Dr. LaSorsa, the guest faculty and the OsseoPure team, so the questions you did not get to ask in the room get answered over a glass of something.

It is also the best hour of the course to compare notes with the other attendees: who is placing what, what has gone wrong, and what they would do differently. Bring your treatment coordinator.

WHEN

Friday, Nov 13 · 5:30 – 7:00 PM

WHERE

OsseoPure HQ · 4401 Walden Ave

WHO

Faculty, OsseoPure team and all attendees

DRESS

Come as you are from the lab

WHILE YOU'RE IN BUFFALO

Where to Stay

We recommend The Delavan, a European style boutique hotel with a spa and Italian fine dining on site, under 10 minutes from HQ. 6461 Transit Road · thedelavanbuffalo.com

Niagara Falls

Thirty minutes from HQ. Arrive Thursday or stay Sunday; the falls are open year round and the mist freezes into something worth the drive.

Eat Like a Local

Buffalo wings where they were invented (Anchor Bar) or where locals argue they are better (Duff's), beef on weck, and a growing downtown dining scene.

Getting Around

Fly into BUF, rent a car or rideshare. HQ, hotels and the airport are all within a 10 minute radius.
