Material & Coverage

Item	Specification
Container Size	5-Gallon Pail
Coverage Rate	3,000-4,000 sq. ft. per 5 gallons
Recommended Application Temperature	50-95°F
Dry Time	30-60 minutes to touch; fully absorbed within 24 hours
Clean-Up	Soap and water before drying

Application of Roof Sauce

Inspection & Prep

- Ensure the roof is clean and dry.
- Blow off debris before application.
- Shingles may be slightly damp after pre-cleaning.

Mixing

- Dilute 1 part concentrate to 2 parts water.
- Mix for 2-3 minutes using a mixing paddle.
- 5 gallons of concentrate yields 15 gallons of ready-to-apply solution.

Roof Sauce Quick Start Guide

PROFESSIONAL ROOF REJUVENATION APPLICATION GUIDE

Application

- Avoid windy or rainy conditions.
- Apply using a backpack sprayer or soft-wash high-volume sprayer.
- Apply evenly from eave to ridge in a consistent fan pattern.
- Avoid puddling and walking on treated areas.
- Slightly overlap passes for maximum coverage.

Post Application

- Allow 30-60 minutes of dry time.
- Product fully cures within 24 hours.

Documentation

- Capture before, during, and after photos for marketing and proof of service.

Benefits

- 7-year warranty.
- Superior penetration and longevity versus soy/corn oil products.
- Non-toxic, plant-based, and safe for vegetation.
- Can extend shingle life up to 15 years with periodic treatment.

Average Job Time

Roof Size	Estimated Time
2,000-3,000 sq. ft.	1.5-2 hours (2-person crew)
3,000-4,000 sq. ft.	2-2.5 hours (2-person crew)
4,000-5,000 sq. ft.	3-3.5 hours (2-person crew)
