WHO WE ARE

About Eco Innovative Construction

Eco Innovative Construction is a pioneering construction company dedicated to delivering sustainable, environmentally conscious building solutions. With a focus on innovation, quality, and eco-friendly practice, we're transforming the construction industry — one project at a time.

We integrate **green technologies, renewable materials, and efficient construction processes** into every build, giving property owners structures that perform better and cost less to run — without compromising on design or durability.

From blueprint to final panel installation, our team manages the full journey: design, construction, solar integration, and long-term maintenance — all under one roof.

Our Vision

A world where construction projects meet functional and aesthetic needs while minimizing their ecological footprint. We aspire to be a global leader in sustainable construction — setting new standards for the industry.

Our Mission

To lead the construction sector toward a sustainable future — creating innovative, energy-efficient buildings that balance modern architecture with responsible resource management.

WHAT WE DO

Our Services

01

Green Building Design & Consultation

Sustainable building design that maximizes energy efficiency and uses renewable materials to cut environmental impact.

02

Construction

Comprehensive project management from design through completion, ensuring excellence at every stage.

03

Solar Panel Supply & Installation

Supplying and installing cutting-edge solar panels that harness clean, renewable energy for your property.

04

Efficient Construction Practices

Modular construction and advanced prefabrication that minimize waste, speed up timelines, and lower costs.

05

Roofing

Quality installation, repair, and maintenance that safeguards your property for the long run.

06

Interior Design

Transforming spaces into beautiful, functional environments tailored to how you actually live and work.

OUR TRACK RECORD

Why Property Owners Choose Us

1000kW+

Combined solar capacity installed across our projects

100+

Households served across Metro Manila & Luzon

₱150K+

Peak monthly savings reported by a single client

2018

Building sustainably since our founding year

Sustainability by Design

Every project starts with energy efficiency and renewable materials — not as an add-on, but as the blueprint.

Full-Lifecycle Solar Expertise

From grid-tie to hybrid setups, we size, install, and monitor systems built to perform for decades.

One Team, Start to Finish

Design, construction, solar, and maintenance under a single point of accountability — no handoffs, no gaps.

Real Numbers, Real Savings

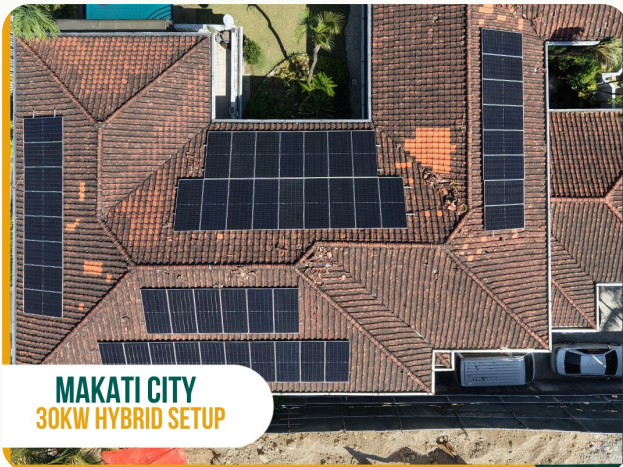

Our clients see savings show up on their electricity bill within the first month of going live.

OUR PROMISE

Every rooftop we power is one less bill to worry about — and **one more step** toward a cleaner grid.

REAL REVIEWS, REAL RESULTS

What Our Clients Say

“

Mrs. Elsa Pleta

★★★★★

Very professional from site visit to installation — the solar panel layout was perfect and cables were properly installed. We're very happy with the performance, and appreciate the good after-sale service!

“

Mr. Ronald Reyes

★★★★★

Best decision we've ever made. Engr. Dani's unwavering responsiveness — even on Sundays — put our minds at ease. We've significantly reduced our electric bills and now have uninterrupted power, even during blackouts.

“

Ms. Joy Racelis

★★★★★

Everyone was professional and easy to talk to. Dani explained everything clearly, and the results matched exactly what he recommended — savings showed up on our very first bill. We'd recommend them in a heartbeat!

“

Mr. Ace Fulgencio

★★★★★

Everything changed when EIC installed our Hybrid Solar system. Now we enjoy 24/7 aircon without worrying about electric bills — such a relief to finally have stable, reliable power. Comfort, control, and confidence.

“

Ms. Ivy Fajardo

★★★★★

The experience was excellent from start to finish. The team was professional and knowledgeable, and the owner was very hands-on throughout. Everything was completed on time, with noticeable savings already.

“

Ms. Aimee Rose A.

★★★★★

Fast and easy transaction with Dan. We were educated on everything needed before, during, and after the installation of our solar panels. Thank you so much!
