Your AI partner in lead management

70% of Online Prospects Abandon Before Completing the Journey

Whether it's an online quote request, mortgage pre-approval application, service booking, or e-commerce checkout, the majority of visitors drop off—costing businesses millions in unrealized revenue.

Leadcentrix Abandoned Recovery Brings Them Back

Real-time AI detects when someone starts but doesn't finish a form or cart, then triggers personalized, multi-channel recovery sequences (SMS, email, retargeting) with dynamic offers, urgency, and exact cart/form contents referenced.

Why Generic Reminders Fail & We Succeed

1. Messages sent within 5–15 minutes while intent is still hot
2. • Personalized ("Sarah, your kitchen remodel quote is waiting…")
3. • Multi-touch cadence with escalating value (discount, bonus, limited slots)
4. • Works with Shopify, WordPress, ClickFunnels, custom forms, mortgage CRMs, etc.

Typical Recovery Rates

15–35% of abandoned sessions converted to sales or appointments
• Home services recovering roofing and HVAC quotes worth $10K–$50K each
• Mortgage sites turning partial applications into funded loans
• E-commerce and booking engines adding 20–40% to monthly revenue

Effortless Process

1. Connect your website or form tool
2. AI begins monitoring abandons in real time
3. Recovery sequence launches automatically
4. Conversions and revenue tracked and attributed in your dashboard

Stop quietly losing 70% of your online prospects. Activate Abandoned Recovery and watch recovered revenue hit your bottom line the same week. Get started in minutes at leadcentrix.io
