

Your Google Rating Is Your New Storefront

88% of consumers trust online reviews as much as personal recommendations, and a single unanswered negative review can cost you dozens of future clients.

Leadcentrix Google Reviews AI Manages Reputation on Autopilot

The moment a new review posts, our AI analyzes sentiment and context, then drafts (or auto-posts with your approval) personalized, on-brand responses that thank 5-star reviewers and professionally resolve concerns—turning detractors into advocates.

Simple Setup

1. Connect your Google Business Profile (under 2 minutes)
2. Choose auto-post or approval workflow
3. AI begins responding and requesting reviews from happy customers
4. Track rating trends, response times, and traffic impact in one dashboard

Real Results Clients Achieve

- Average star-rating increase of 0.4–0.9 within 90 days
- 3–5× more total reviews from proactive follow-up requests
- Local SEO boost—higher rankings and 20–40% more profile clicks
- Hours saved every week on manual review management

Why It Works

- Responses posted within minutes signal you care
- Positive reviewers feel appreciated and refer others
- Negative situations de-escalated publicly (and often flipped to 4–5 stars after resolution)
 - Fully customizable tone library (professional, friendly, empathetic, etc.)

A 5-star reputation shouldn't depend on remembering to check Google every day. Let AI protect and grow your most valuable digital asset. Start for free at leadcentrix.io
