ReGen Medical® RCT INDUSTRIAL | INDUSTRIAL

TERM SHEET

RCT INDUSTRIAL

Industrial-duty onsite soft-tissue first aid, delivered as a fixed monthly program — device, training, service and support included.

MANAGED FIRST AID PROGRAM

$4,000 /mo

60-month program commitment

No upfront equipment purchase

$48,000 annual program cost = **$48,000** average cost of one medically consulted injury (NSC, 2024)

The program costs about what one injury costs. Everything past the first is margin you keep.

THREE REASONS THIS MODEL MAKES FINANCIAL & OPERATIONAL SENSE

1. NO CAPITAL REQUEST

ZERO UPFRONT.

An operating line item, not an equipment approval cycle. Nothing to depreciate, nothing to justify to the capital committee.

2. FIXED AND FORECASTABLE

ONE NUMBER.

Device, training, service, maintenance, protocol and support in a single monthly figure. No variable costs to budget against.

3. COST MEETS BENEFIT

SAME PERIOD.

The expense lands in the same period as the operational return — not a Year One outlay against a multi-year benefit.

MODELED RETURN — REPRESENTATIVE FACILITY

40 injuries × $48,000

$1,920,000

annual direct exposure

Before overtime, retraining, or lost production velocity.

COMPRESSION	PRESERVED ANNUALLY	VS. PROGRAM COST
Conservative — 10%	$192,000	4×
Moderate — 20%	$384,000	8×
Strong — 30%	$576,000	12×

Modeled against national benchmarks. Not a guarantee of savings or claims outcomes.

MANAGED MEANS MANAGED.

Everything required to run the program, included in the monthly figure.

Deploy — Device + facility implementation

Train — Operator training + red-flag protocol

Brand — Custom-branded training + onsite instruction sheets

Maintain — Service, maintenance + technical support

Document — Reporting + ongoing program governance

OSHA RECORDKEEPING ANCHOR

29 C.F.R. § 1904.7(b)(5)(ii)(M) lists "using massages" as first aid. RCT Industrial operates inside that framework under a written protocol. No change to existing recordkeeping practice required. Recordability always depends on the facts of each case.

THE COST OF INACTION

$181.4B

2024 U.S. work-injury cost (National Safety Council). Severity inflation continues regardless of safety performance.

BUILD THE MODEL AGAINST YOUR OWN CLAIMS HISTORY.

1 RCTI DEVICE PER 200 ACTIVE FULL-TIME EMPLOYEES PER SHIFT

Sources: OSHA 29 C.F.R. § 1904.7(b)(5)(ii)(M); OSHA Clarification of Soft Tissue Massage (May 23, 2019); OSHA MSK Recordkeeping Enforcement Guidance (May 2, 2024); NSC 2024 work-injury cost estimate. ReGen RCT Industrial is intended for defined first-aid/wellness use under facility protocol. It does not diagnose injuries, replace required medical evaluation, or determine OSHA recordability. Financial scenarios are modeled illustrations. Program availability, credit approval, taxes and final contract terms may apply. Customers should determine accounting treatment with its own advisors.
