

G.A.B.E. Capability Statement

Government Agentic Bid Engine — AI-powered solicitation review, bid pricing, teaming coordination, and purchase-order funding support for small businesses and prime contractors.

1. EXECUTIVE SNAPSHOT

G.A.B.E. (Government Agentic Bid Engine) by **Avinosoft** is an end-to-end intelligence platform engineered to eliminate structural barriers for government contractors. By integrating technical solicitation analysis, financial modeling, structured teaming workflows, and direct post-award financing, G.A.B.E. enables firms to bid faster, price accurately, and execute contracts with total financial confidence.

AI Solicitation Ingestion

Extracts due dates, NAICS codes, set-aside parameters, line items, and specs from technical PDFs in seconds.

Teaming & Lead Routing

Centralizes opportunity tracking with executive notifications to streamline JV and prime-subcontractor alignment.

E-Commerce Platform ([buypaq.com](#))

Streamlines procurement sourcing and direct supplier purchasing through an integrated digital marketplace.

Precision Margin Modeler

Calculates competitive, profitable unit bids using supplier pricing, multi-tiered markups, and target gross margins.

Integrated Purchase-Order Funding

Direct pipeline to CreditSmart lines up to \$5,000,000 to solve cash-flow bottlenecks and accelerate fulfillment.

Contract Financing ([americancreditassurance.com](#))

Provides specialized government contract funding, mobilization loans, and working capital lines.

2. G.A.B.E.'S CORE CAPABILITIES & OPERATIONAL WORKFLOW

Market Need	G.A.B.E. Response	Business Value
Complex Bid Documents	Extracts due dates, NAICS codes, set-asides, line items, specs, and contracting details automatically.	Reduces manual review time by 80% and improves bid readiness.
Profitable Pricing Strategy	Models supplier cost, tier-based markups, and unit bid metrics dynamically.	Supports win-rate optimization with real-time margin visibility.
Teaming & Partner Control	Routes inputs to a central database and issues executive teaming alerts.	Improves lead tracking, JV alignment, and subcontractor execution.
Fulfillment Working Capital	Connects users to CreditSmart purchase-order options up to \$5,000,000.	Bridges working capital gaps immediately following contract award.

1

Upload

Import solicitation PDFs into the AI engine.

2

Compliance

Verify NAICS, set-asides, line items & specs.

3

Model Pricing

Calculate cost markups, unit bids & gross margins.

4

Route Teaming

Dispatch opportunities for JV / partner review.

5

Get Funding

Submit capital request up to \$5,000,000.

3. CONTRACTOR USE CASES & MOBILE ACCESS

Use Case	Challenge	G.A.B.E. Outcome
First-Time Small Business Vendor	New supplier responding to a technical DLA solicitation with limited federal bid experience.	Extracts set-aside status, NSN line items, and compliance rules to produce an organized quote rapidly.
Joint-Venture Teaming	SDVOSB prime contractor requires capital and partner alignment for a multi-million dollar Navy requirement.	Identifies requirements, routes JV data to key partners, and initiates CreditSmart capital evaluation.

Device Platform	Mobile Installation Guide
iPhone / iPad (iOS)	Open the G.A.B.E. web app in Safari → tap Share → select Add to Home Screen → confirm name and tap Add .
Android	Open the G.A.B.E. web app in Chrome → tap Three Dots Menu → select Install App / Add to Home Screen → confirm.
