

AV RIDER

Erez's keynote, *The Hidden Cost of Indecision*, is story-driven, practical and built around your audience's real decisions.

So your audience gets the full impact, the following setup is requested for all live and virtual events.

PRESENTATION SETUP

- Erez will bring his own laptop (MacBook Pro) and remote clicker.
- He will supply his presentation preloaded and ready to run via Keynote or PowerPoint, depending on the event's preference.
- A backup version will also be provided on a USB drive.
- The presentation slides are shared via Google Slides (live via web). If needed, a separate file copy can be provided in case wifi issues arise.

AUDIO VISUAL REQUIREMENTS

To ensure optimal delivery and audience connection, please provide:

- High-definition projector or LED screen suitable for venue size
- Quality sound system (audio will run directly from his laptop)
- Wireless lapel or headset microphone (preferred for movement and storytelling)
- Comfortable stage space, clear of lecterns or barriers
- Two bottles of room-temperature water on stage

If Erez is part of a panel or moderated discussion, please confirm whether handheld microphones are provided for each participant.

LIGHTING & STAGING

- Standard warm stage lighting (no spotlight required)
- Stage or platform height suitable for clear visibility of Erez and slides
- Podium not required

Erez values authentic, human connection. Please ensure the room setup encourages open visibility between him and the audience. Theatre or cabaret seating is ideal.

TECHNICAL NOTES

If you require Erez's presentation file in a specific format (e.g., PowerPoint instead of Keynote), please notify his team at least five (5) days prior to the event.
