

SAFETY & COMPLIANCE MODULE

Build Safer Sites. Stay Compliant. Reduce Risk.

WMS gives construction businesses one central digital system to manage safety & compliance from inductions & SWMS to incidents, inspections, and registers.

It reduces admin, boosts accountability, and keeps teams audit-ready with real-time access and structured reporting across every project.

Why It Matters?

Safety failures in construction cause costly delays and risks WMS replaces fragmented paperwork with one digital system, giving teams real-time access, streamlined workflows, and safer, audit-ready sites.

Key Benefits

- Digitise & centralise safety processes
- Boost visibility across sites & teams
- Cut paperwork and reporting delays
- Keep accurate, audit-ready records
- Strengthen safety culture & compliance

What the Module Covers

- ✓ Digital Safety Documentation
- ✓ Incident & Hazard Reporting
- ✓ Inspections & Safety Checks
- ✓ SWMS & Compliance Sign-Offs
- ✓ Contractor Compliance Control
- ✓ Audit-Ready Record Keeping

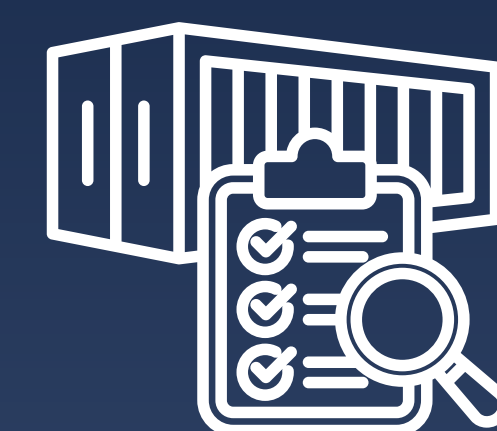

Incident & Hazard Management

Capture incidents, hazards, & near misses quickly through a structured digital process that improves response time, accountability, & record keeping.

SWMS & Safety Document Control

Manage SWMS, safety forms, and compliance documents in one centralised system with easy access, approvals, and digital sign-offs.

Inspections & Compliance Tracking

Conduct site inspections, monitor compliance status, and maintain accurate audit-ready records across all projects and teams.
