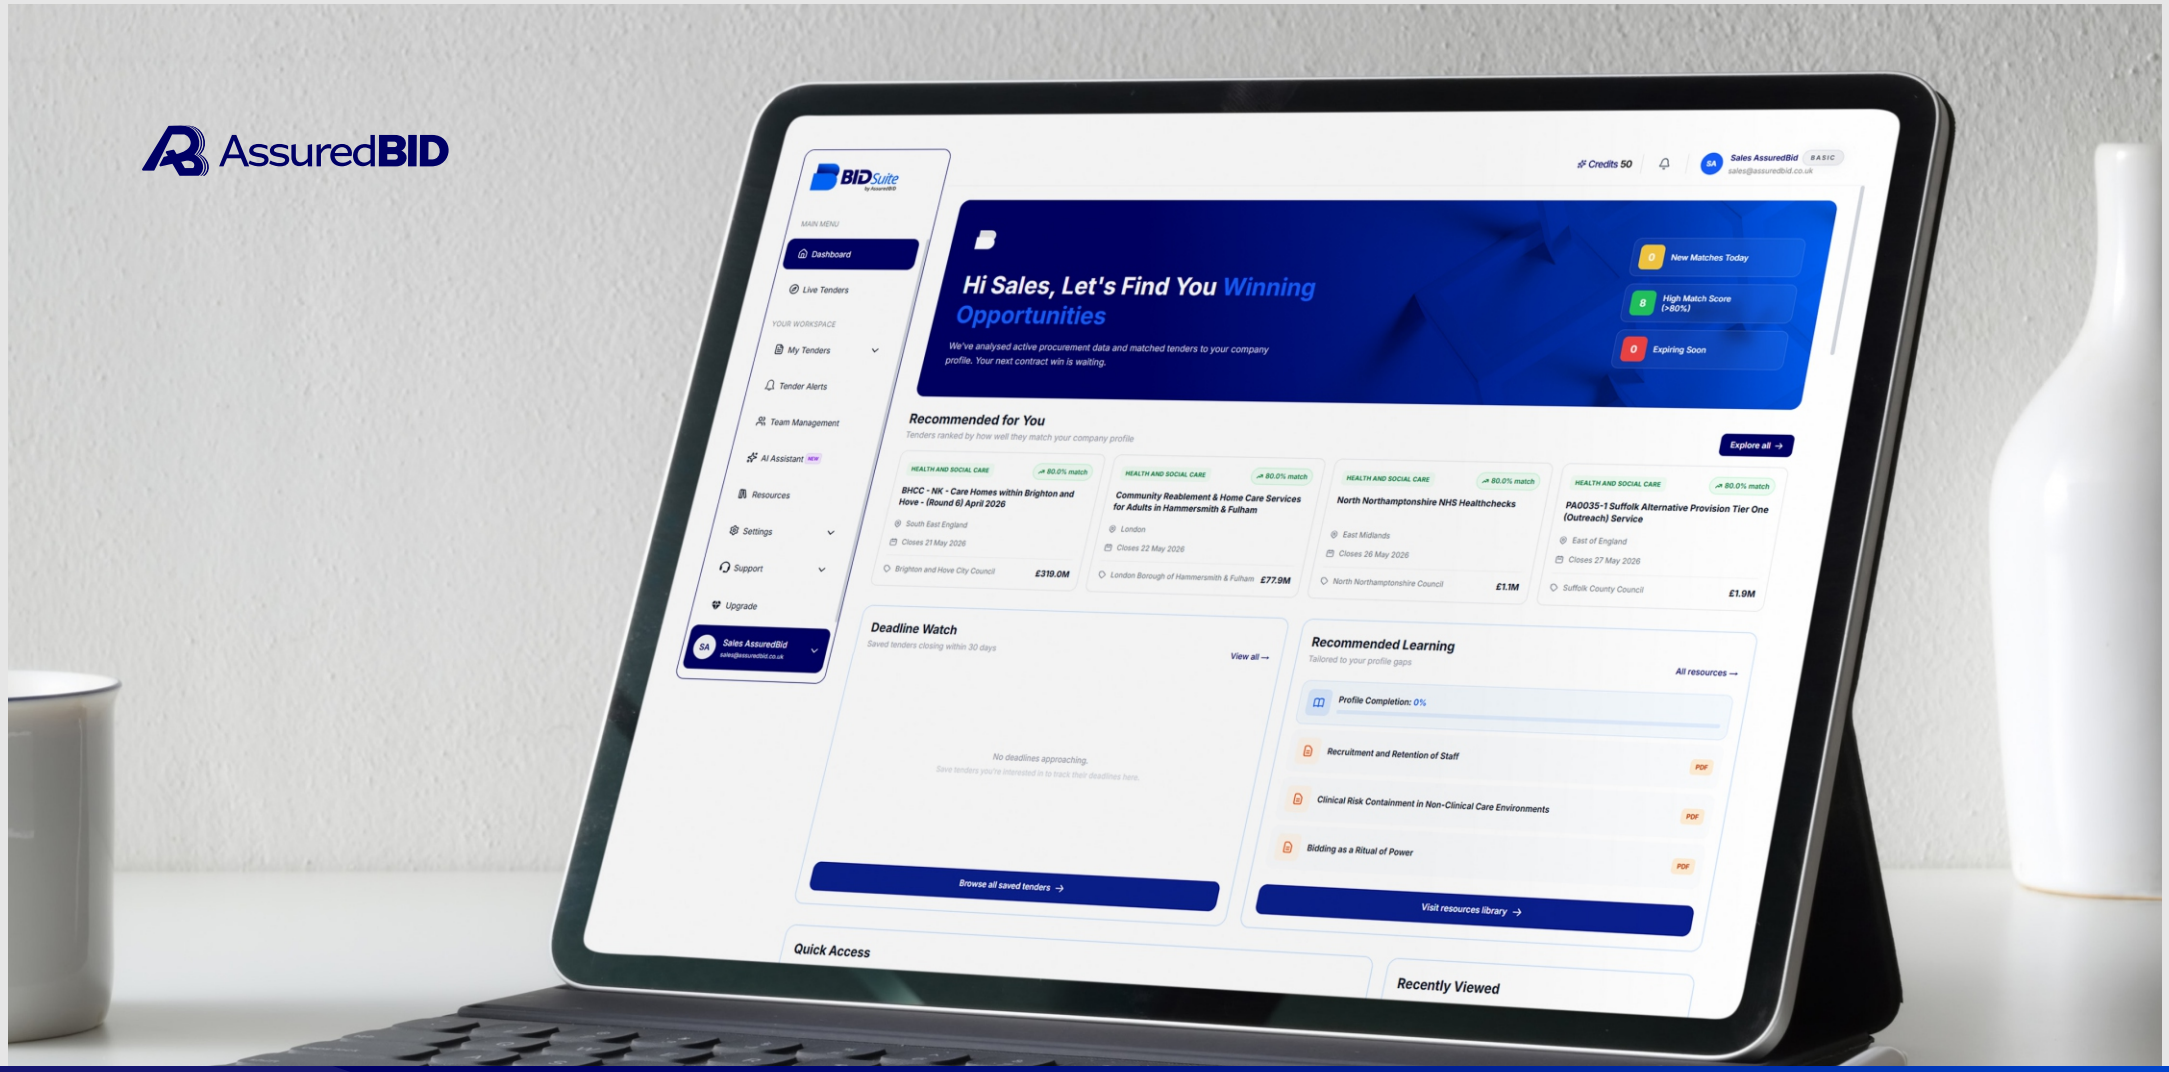
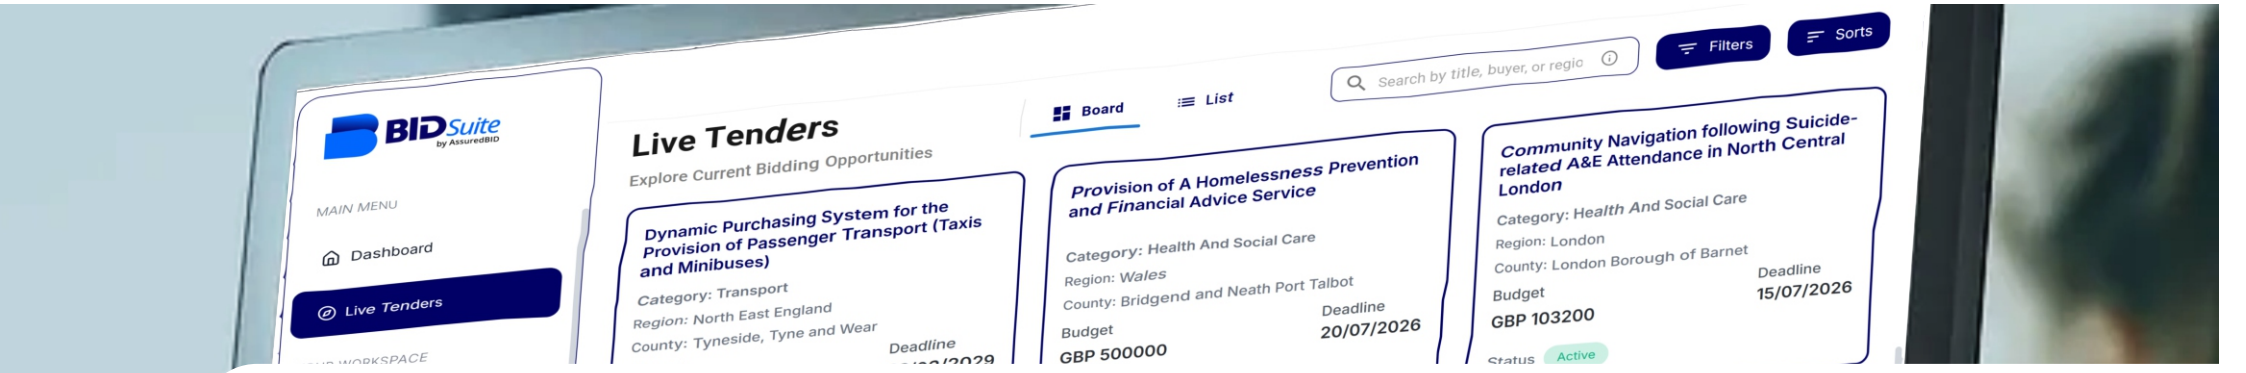
AssuredBID



BID TRACKING SOFTWARE



FIND THE CONTRACTS YOU'RE ACTUALLY SUITED TO WIN

Every day, thousands of tenders are published across the UK. The challenge isn't finding opportunities - it's finding the right ones.

BIDSuite is an intelligent tender platform built for care, housing, and transport providers. It learns about your business and automatically highlights opportunities that match your services, locations, and capabilities.

Instead of wasting hours reviewing unsuitable contracts, you'll focus on opportunities that make sense for your organisation.

Perfect For:

Domiciliary Care • Supported Living • Residential Care • Children's Services • Housing Providers • Temporary Accommodation • Patient Transport • SEND Transport • Community Transport and more ...

TENDER SMARTER, NOT HARDER

BIDSuite does more than show you tenders.

Before you invest time preparing a bid, our Pre-Qualification Assessment helps you understand whether you meet key requirements such as experience, turnover, certifications, and eligibility criteria.

You'll also receive intelligent alerts whenever opportunities matching your profile are published, ensuring you never miss a relevant contract.

Everything is stored in one place — tender documents, previous submissions, policies, evidence, and templates — giving your team instant access whenever it's needed.

Less Searching. Better Decisions.
