

THE SCIENCE BEHIND H-WAVE®.

Your body is designed to heal itself, consider the H-Wave as an assistant that can increase your body's efficiency. The body contracts skeletal muscles in order to circulate blood and improve lymphatic flow. H-Wave can create a similar contraction without fatiguing the muscles or causing harmful side effects. These muscle contractions assist in the reduction of inflammation and enhance recovery. By working with the body, not against it, H-Wave creates a profound rehabilitative benefit which can last long after the device has been turned off.

Our H-Wave specialist will work with you to reach a customized therapeutic intensity.

LOW Frequency: Active Rehabilitation to Unblock the Pathway to Recovery

This LOW frequency visibly contracts the muscle fibers during activation to promote blood flow, lymphatic circulation and tissue rehabilitation for accelerated recovery.

HIGH Frequency: Breaking the Chronic Pain Cycle

This frequency is designed to manage pain by shutting down your pain signals to provide long lasting pain relief. HIGH will create nerve activation where a buzzing, tingling or sometimes itchy sensation will occur. The pain relief is so effective and immediate that H-Wave is the only device FDA cleared for use as dental anesthesia.

THE BEST IN DRUG-FREE PAIN RELIEF AND REHABILITATION

H-Wave, a veteran owned company, is used by more than 70 professional athletic teams and has 13 published, peer-reviewed studies.

Here is what our patients have said:

"I am so appreciative for the H-Wave machine. It has alleviated a lot of my nerve pain, which allows me to function physically at a greater capacity. I am forever grateful."

- H-Wave Home User

"I have used H-Wave for several years and the relief I get treating my knees and back are without parallel. I never travel without my H-Wave."

- H-Wave Home User

"H-Wave has been such a blessing in my household. I originally bought a unit to work on chronic issues in my shoulder and ribs and soon discovered many other everyday uses that have made a huge difference in my well being."
