## **The Julie E Laser**

Light creates energy as it travels; at 186,000 miles per second - so it makes sense that we use lasers at Julie E Health, because we always have the Simplest Solutions to Health. Our lasers heal the body as they reprogram cell pattern and cell memory – so you truly get a ‘new’ body after using this laser!

Bacteria and virus can be destroyed and cells rejuvenated quickly! Today, lasers are used for everything from surgery, to hair removal, and skin rejuvenation. So, why not use lasers for healing from virus, bacteria, scars, traumas, calming, and overall health rejuvenation? Using this laser allows Julie E to heal people FAST, and also to uncover the root of a person’s health concerns. We use this laser in the clinic (5 of them at one time!) and now you can take one home with you and help your entire family and pets to have instant relief from a stressful day or a collision on the playing field. This truly provides ‘healing at the speed of light’ (as fast as Superman 😊)

## **How does it Work?**

The laser donates photons to your cells. **This builds ATP by 150%**. (ATP = Energy). This helps to increase circulation and improve the function of every body part. Whether you have sluggish bowels, acne, headaches or erectile dysfunction, using this laser will help your body to build new healthy cells and the chronic issues will begin to dissipate. We eat fruits and vegetables which are growing outside 24/7 in the light, doing photosynthesis all day long. The laser brings this to your body instantly. The increase in energy is limitless, because the light also restores the BioField. If you know Julie’s work, she talks about the Biofield being intact leading to LIMITLESS HEALING.

Injuries, scars, stitches and even emotional trauma lead to energy blocks – which eventually lead to infection, toxicity and a variety of health issues in random places around the body. Placing the laser on the body leads to instant unwinding of the nervous system, and direct energy to the cells under the light. When cells have light, they gain energy, and this allows the body to heal at a rapid pace. Most people express feeling calm, clear and ‘better’ after a short amount of laser. Imagine having your own and being able to duplicate this anytime of day or night for any member of your household. This would mean less doctors visits, less lab work, better digestion, better sleep, more focus and clarity and overall increased sense of well-being.

This laser makes the pH alkaline and increases stem cell regeneration.

**Simple Solutions  
for Health**  
[www.JulieEHealth.com](http://www.JulieEHealth.com)

The laser owners all say 'I love my laser' so that became the URL used for this device☺. Every one of our clients who purchased a laser express using it all of the time. It might be the best health decision you've ever made. With times as they are, health is really the top priority, worldwide. Keeping the biofield strong, the Assembly Line (detox system) working optimally and the mind strong are what will help people to stay the course of true health.

**How to use it:** power it on and place it on the body. It's that Simple. If you don't feel anything, move it somewhere else.

### **This Laser is Unique!**

There are **3 different lights in the one handheld paddle that fits in a purse or a travel bag. You can take this with you everywhere you go!** Most companies use one laser in their products. This laser was created by a yogi who's father was a Harvard medical doctor, and all his doctor friends were talking about lasers. It was created and used on a dental infection that instantly became pain free and healed.

Many lasers cost \$18,000 are huge and require an MD to use. This laser runs about \$2700 (sometimes we receive manufacturer specials). An entire family can have instant healing on less than the cost of some medical treatment. Imagine a broken bone or nose – and the ability to instantly reprogram the cells to remove and release trauma and infection and rejuvenate the area, all from your home or your car, or the scene of the accident! The healing time would be reduced by weeks.

We are made up of cells. With all the stress and toxicity in the world, these cells often do not work correctly – but if they did, then we should be healthy, right? So why not reprogram our cells and experience health instead of living with issues and being told by doctors there is no remedy or body parts need to be cut out. A cell divides and replicates all the time, so healthy cells will make newer and healthier cells if you use the laser.. And these cells will have the ability to create their own new cell patterns and memory. The laser can be used to remove a parasite, infection, heavy metal toxicity or emotional trauma, all the cells in, say for example, your liver will be ready for new, healthy programming. They won't start off with the same problems your older cells had.

To understand this concept, take a look at chiropractic treatments. An adjustment releases pain, but it comes back again in the same place because the cells are still the same. If we use the laser, the cells near the spine can reprogram and re-pattern, so the body would not necessarily go out of alignment in the same way again.

*\*In cancer the mitochondria stops producing ATP and this laser helps the production of ATP. How amazing would it be for your friend or relative battling cancer to use this laser??? I would love to make that happen!*

### Why Should I use this Laser?

Just like you want your car to ‘start’ every day, we want our body to ‘start’ every day. Fortunately we awake every day, unfortunately, so many people don’t ‘work’ perfectly. That’s what is referred to as aches and pains. When we work well, we eliminate waste, have energy, circulation, and an overall happy sense of well being. Our hormones are made, and things just feel good! **Reminder: we always need circulation in *all* areas of the body, to have a ‘well- oiled’ machine, called YOU.**

### **General Information:**

- A. Quantum Wave** is a **Scalar Wave CLASS III (over the counter) Laser**. Its one key benefit is that it **donates photons (light packets) to the body**. It stimulates the mitochondria around the nucleus and is good at replicating cells, increasing the ROR (rate of regeneration) and increasing the ATP or energy molecule. It helps clear out the old programs (cell memory) from generation to generation of cell reproduction. The photons stimulate electron flow/coherence stimulates cellular energy. Allows you to rest in Neutrality (prana, chi)—a doorway into the energy of the Universe.
- B. Your cells regenerate every day:**
  - 1 year for brain
  - 4 months for blood
  - 3 months for entire skeleton
  - 2 months for new DNA
  - 6 weeks for new liver
  - 1 month for new skin
  - 5 days for new stomach lining
  - 2 days for new eyes
- C.** In Stillpoint, Cells release **Nitric Oxide: endorphins, opiates, serotonin, etc. Bliss** is physiological response. If the body has any issues, something is not processing.
- D. Adrenaline** shuts down all other bodily functions, i.e. like a General telling everyone to run for cover while he handles the crisis (then ramps up blood pressure). We are constantly in flight or fight in this age. The glands become entrained to this and govern the cranial system.
- E. Professional endorsements:** Miami Heat, SF 49ers, NY Giants, Chaka Khan, Queen of Malaysia, Donna Gates, Dr. Patrick Flanagan and more.
- F. Three different wavelengths**, all 100 milliwatts (mw) in probes and 5 mw in laser.

1. **Red rays:** good for surface cells, meridians, nerves, facials, open wounds, skin, muscle, all soft organs and glands.
  2. **Infrared rays:** penetrate deeper into the body to bones, tendons, cartilage, discs, and bone density. Google: Infrared Clinical Studies
  3. **Violet rays:** more non-linear: stress, emotions, balances the chakras and meridians, stimulates telomers, stem cells, anti-bacterial, anti-fungal, anti-viral, acne, facials, key enzymes, auras, chakras. Carries more information. Most powerful in the industry.
- G. Scalar Waves:** activate stem cells but have no frequency or direction. Induces scalar energy for arthritis, dental issues. It is a non-directional field, you can't measure it. It has no characteristics to measure. Rest in Neutrality. Charge the space with neutral essence. Ancient Alchemy symbol, caduceus, kundalini, etc.
- G. Stillpoint:** the space between the breaths—the breathless state. Where Yogis live. Inhale. At the top of the breath is where it is. Keep on breathing but hold that awareness. Cannot hold thoughts or emotions very well in this state.  
Cells absorb higher amounts of O<sub>2</sub> and release NO<sub>2</sub>. Body can find solutions if in Stillpoint. Inviting energy to collapse is the same as Stillpoint. Pineal gland calcifies with thinking.
- H.** Live in the Quantum Field, not the personality and emotions. 7.83 Hz (Hertz) is the Schumann Resonance where we live—**Unwind** is that nonlinear scalar wave.
- I. Airports:** say it is a Medical Pain Relief Device. If the general public asks: It is healing light. It activates negative ions—ozone.

**Who owns & uses this same laser?**

- Miami Heat
- Chaka Khan
- Sting has a few
- Johnny Depp
- Shiva Rae- (world renown Yoga teacher)
- Numerous Harvard & Yale Professors
- Patrick Flanagan- (structured water guy)
- Largest Pain Center in Canada-switched from \$45,000 laser to 15 of these Lasers
- Dr. John Brimhall – (a well-known Laser Chiropractor)
- All of the people portrayed in the movie “The Secret”
- players on the 49ers NFL Football team and the head trainer
- Michael Bernard Beckwith (Agape Church)
- New York Giants
- Patch Adams
- The 13 Grandmothers Native American Tribe
- Many Yogis and Shaman all over the world
- You, hopefully ;)

Currently there are about 19,000 of us lucky laser owners
