Building the Role Model Library

Project Number: 2025-1-ES01-KA220-VET-000356026

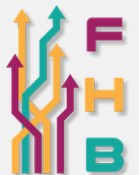

This project has been funded with support from the European Commission. This publication reflects the views only of the author, and the Commission cannot be held responsible for any use which may be made of the information contained therein.

Net Zero Heroes enters its next phase

As the project reaches the end of its first six months, the partnership is moving from set-up into active implementation. After the launch of the project website and the kick-off phase, the consortium is now focused on developing one of the project's core results: the Role Model Library.

Work in progress: inspiring stories from across Europe

The Role Model Library will showcase inspiring women working in green technology sectors across Europe. It will include video interviews and written testimonials designed to motivate women and girls in VET to explore green careers, while also providing practical examples for educators and trainers.

Co-funded by
the European Union

What comes next

Current project focus

At the moment, partners are finalising the collection and preparation of role model materials. In parallel, the consortium is also working on the first six-month project report, reflecting on the progress made so far and preparing the next implementation steps.

In the coming months, the project will continue with the completion of the Role Model Library, ongoing communication activities, and preparation for the next project results. Through these efforts, Net Zero Heroes is building a strong foundation for a more inclusive and visible green transition.

To support smooth and high-quality implementation, the partnership holds regular meetings to review progress, coordinate upcoming tasks, and keep project activities on schedule.
