Summary

I build automations and AI apps for US small businesses: n8n workflows, GoHighLevel funnels and follow-up systems, and Voice AI receptionists that answer calls and book appointments. Every build ships with a video walkthrough and a written handover, so the client's team can run it without me. Three years of GoHighLevel client work (2023 to 2026) across coaching, consulting, accounting, roofing and HVAC. Available full-time, US hours.

Selected projects (videos and live links on my Projects page)

- **Voice AI receptionists (GHL Voice AI, VAPI):** 4 working demos. Answer FAQs, capture and confirm name and email, check the calendar, book and reschedule, then hand off to a GHL follow-up workflow.
- **Invoice Processing Automation:** n8n + Claude + Gmail → Google Sheets. Reads each PDF invoice, extracts vendor, amount, due date and line items; anything incomplete goes to a review path. 10 minutes of typing per invoice → 0.
- **Review Reply Studio:** React / Supabase / Claude app that drafts on-brand replies to customer reviews, with sentiment tagging and a searchable reply history. Live demo.
- **Lead-capture quizzes:** App-Readiness Quiz (6 questions, Claude writes a personalized action plan, prompt caching keeps AI cost low) and a Sales Readiness Scorecard for a coaching client (10 questions, name and email unlock the results). Both live.
- **Daily Job Scraper:** Firecrawl MCP + n8n → Google Sheets + Telegram digest. Filters by eligibility, skips jobs already seen. Running daily since June 2026.
- **GoHighLevel funnels and automations:** 5 automations (Book-a-Call, Digital Product Selling, Live Webinar, Real Estate, Abandoned Cart) and 4 funnels, each with a video walkthrough.

- **Artist gallery system:** React / Supabase website, phone dashboard and a QR code per painting. Live for a 4-day art fair; the artist updates it herself.
- **Facebook page growth (case study):** monetized at 5,800 followers in about 111 days; one reel reached about 1M views; ₱79 digital products delivered on a keyword trigger.

Stack

n8n (self-hosted) · GoHighLevel · Voice AI (GHL Voice AI, VAPI, Retell, Centerfy) · Claude API · Claude Code · MCP · React · Vite · TypeScript · Supabase · Vercel · Firecrawl · Tavily · Gmail API · Google Sheets · Telegram Bot API · Facebook Graph API · Video editing (Filmora)

Experience

n8n Automation Specialist and GHL Funnel Designer and Automation Specialist

Confidential client, Leadership Consulting Firm (Texas) · 2026

Built n8n workflows to automate repetitive tasks across the firm's tools, and designed GoHighLevel funnels and automations for lead capture and follow-up.

GHL Funnel Designer and Automation Specialist Confidential client, Coaching Business (South Carolina) · 2025 to 2026

Designed and built GoHighLevel funnels and booking pages for a coaching business, with follow-up automations so new leads were nurtured and booked without manual work.

GHL Funnel Designer and Voice AI Automation Specialist Confidential client, Roofing Company (New Jersey) · April 2025 to June 2025

Designed lead-capture funnels in GoHighLevel and built Voice AI agents on Centerfy, connected to GHL, so incoming calls were answered, leads were captured, and inspections were booked without the crew stopping work to pick up the phone. Form submissions and calls both fed into automated confirmations, reminders and pipeline updates.

GHL Funnel Designer and Automation Specialist Confidential client, Accounting Firm (New York) · 2025

Built GoHighLevel funnels and lead-capture forms for an accounting firm's services, with automated follow-up to book consultations. Also set up and launched Google Ads search campaigns to bring traffic to the funnels.

GHL Automation Specialist Confidential client, HVAC Company (Pennsylvania) · 2023 to 2024

Built GoHighLevel automations for an HVAC company so service leads got a fast response and appointments didn't slip through the cracks.

Availability

Monday to Friday, 8am to 5pm ET (9pm to 6am PHT). Full-time, 40 hours a week, and open to part-time from 30 hours. Can start Monday, November 2, 2026.
