

Extended Professional Learning Program

Making Meaningful Music in the Preschool Years: Evidence-Informed Professional Learning for Early Childhood Educators

A practical professional learning program that builds educator confidence to embed meaningful music experiences that strengthen language, communication and school readiness in the preschool years.

Why Music Matters in the Preschool Years

Music is a powerful tool for supporting children's development in the two years before school.

- Singing strengthens auditory discrimination, phonological awareness and vocabulary development
- Rhythm and movement support attention, memory and self-regulation
- Shared music experiences build communication and social connection

These experiences support the development of foundational language and cognitive skills and contribute to reducing developmental vulnerability in the preschool years.

Aligned with the AEDC Language and Cognitive Skills domain.

What Educators Will Experience

Live Professional Learning Masterclass

A practical two-hour interactive session introducing meaningful music strategies educators can implement immediately.

Six-Week Guided Implementation

Support for educators to trial strategies within their play-based preschool program. Online forum and accountability.

Weekly Micro-Lessons and Resources

Short video lessons and implementation prompts designed for busy educators.

Live Consolidation Session

An opportunity to reflect on learning, address challenges and strengthen ongoing practice.

Making Meaningful Music in the Preschool Years: Evidence-Informed Professional Learning for Early Childhood Educators

Expected Outcomes

For Educators

- Increased confidence leading music experiences
- Practical strategies for embedding music into daily routines
- Stronger understanding of music's role in language development and school readiness

For Children

- Strengthened phonological awareness and vocabulary
- Increased engagement, participation and communication
- Improved attention, pro-social behaviour and early pattern recognition

Program Delivery

- 2-hour online masterclass
- 6-week guided implementation program
- Weekly video lessons and educator forum support
- Final live consolidation session

Available to services across metropolitan, regional and remote Australia & New Zealand

Delivered nationally through partnerships with organisations including ECA, CELA, ELAA, Federation University and Playgroup Victoria.

Program investment from \$2400 + GST per service
